

Think Like an Animal

Indoor/Outdoor Habitat Scavenger Hunt

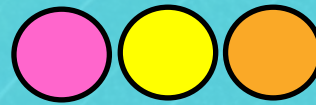

Complete the following in your neighborhood, in your yard, around your home or even with picture books and magazines. Make an “x” next to an item when you find or complete it!

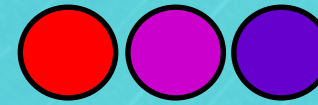

- Find a source of water for an animal
- Find a source of food for an animal (not pet food)—who eats it?
- Find a home for an animal—what do you think might live there?
- “Bee” a pollinator! Pollinators are attracted to many different colors. Can you find all of these bee, hummingbird and butterfly colors? Make a line through each color when you find it!

BEE

BUTTERFLY

HUMMINGBIRD

- Observe, but don't touch, a creature that is blending in with its surroundings.
- What colors are you wearing? Find a spot where YOU might be able to camouflage or blend in.
- Observe 3 different creatures (a wild animal or a pet) and try to move like they move.

BONUS—Find evidence of an animal! (Hint: how can you tell that an animal was around if you don't see the animal?) What animal do you think left that evidence? Draw a picture of the animal along with where it lives and what it eats!
