Winter Break Boredom Busters

Finger Knitting

No knitting needles required! Knit for about 8 inches to make a bracelet, a little longer for a headband, or just keep going until it’s as long as you like.

**Step 1**- First, take the end of your yarn and hold it between your thumb and forefinger. Pulling yarn from your ball, or the longer “working” end, weave between your fingers, starting behind your pinkie and then in front of your ring finger.

**Step 2**- Next, weave the yarn back across your fingers until it crosses in front of your pinkie.

**Step 3**- Then, wrap your yarn around all your fingers one time (this is the only time you will do this).

**Step 4**- Pull each bottom loop of yarn over the top loop (be careful to leave the top loop) and off your finger, starting with your pinkie.

**Step 5**- Now, just weave your yarn across your fingers and back again. This will create a new set of loops on the top. Repeat step 4 then do it all again until your knitting is as long as you’d like it.

**Step 6**- When you are finished, weave the working end of your yarn THROUGH each loop on your finger as you pull them off. Tie the end of your working yarn to the last loop to finish your project!
